A One Day Seminar
on
Opportunities and Challenges in
Starting a Pharmacy Business.
11th-April - 2023

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D. This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- The course will give knowledge about the Opportunities and Challenges in Starting a Pharmacy Business.
- By participating in the program, individuals can gain a better understanding of the pharmacy industry, including the different types of pharmacies, regulations, and emerging trends.
- The program can help individuals develop their business planning skills, including how to create a business plan, financial projections, and marketing strategies.
- The program can provide information on different funding options for starting a pharmacy business, including loans, investors, and grants.
- The program can help individuals develop their financial management skills, including accounting, budgeting, and cash flow management.
- The program can help individuals develop their staff management skills, including how to recruit, train, and manage pharmacists, technicians, and support staff.

Resource Person:

Dr.R.Venu Priya,
Associate Professor,
Department of pharmaceuticals,
Anwarul uloom college of pharmacy,
Hyderabad

Last date to Registration: 08-04-2023

Objectives of the program:

- Explore the opportunities and challenges in starting a pharmacy business is to understand the market and industry landscape, including the competitive landscape, regulatory environment, and emerging trends.
- To identify potential business opportunities, such as offering specialized services, filling a gap in the market, or providing unique products.
- To create a roadmap for the pharmacy business, including financial projections, marketing strategies, and operational plans.
- To obtain the necessary capital to start the pharmacy business, which may involve securing loans, finding investors, or applying for grants?
- Building a team is to hire and train staff who can provide high-quality services to customers, manage the operations of the pharmacy business, and support the growth and success of the business.

Topics to be covered:

- Developing a business plan
- Securing funding
- Managing finances
- Managing risk
- Providing high-quality services.

AWARENESS PROGRAM

ON

IP VALUATION AND COMMERCIALIZATION

IN PHARMACEUTICAL INDUSTRY

9TH MARCH 2023

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about IP Valuation and Commercialization in Pharmaceutical Industry.

- By valuing and commercializing their intellectual property assets, pharmaceutical companies can generate revenue through licensing deals, partnerships, and other commercial arrangements.
- A strong intellectual property portfolio can give a pharmaceutical company a competitive advantage and increase its market share.
- IP valuation can provide pharmaceutical companies with a better understanding of the value of their intellectual property assets, making it easier to secure financing and investment.
- By identifying potential risks and developing strategies to mitigate them.
- A strong intellectual property portfolio can enhance the reputation and brand value of a pharmaceutical company, making it more attractive to investors, customers, and partners.

Resource Person:

Mrs. S.Kalpana,
M. Pharm, Ph.D
Associate Professor,
Department of Pharmacology,
P.Rami Reddy Memorial College of
Pharmacy, Kadapa, Andhra Pradesh.

Last date to Registration: 08-03-2023

Objectives of the program:

- IP valuation helps pharmaceutical companies to identify and evaluate the value of their patents, trademarks, trade secrets, and other intangible assets.
- Pharmaceutical companies invest significant resources in research and development (R&D) to create new drugs and therapies.
- Intellectual property rights give pharmaceutical companies exclusive rights to use and license their innovations.
- To help pharmaceutical companies to secure financing and partnerships by providing a clear understanding of the value of their IP assets.
- To help pharmaceutical companies to manage risk by identifying potential threats to their IP assets and developing strategies to mitigate those risks.
- To enhance the reputation and brand value of a pharmaceutical company, attracting investors, customers, and partners

Topics to be covered:

- Intellectual property valuation methods
- IP commercialization strategies
- IP asset management and risk management
- Regulatory considerations
- International IP protection
- Emerging trends in IP valuation and commercialization

Outcome of the program

Our students and faculty had learned about IP Valuation and Commercialization in Pharmaceutical Industry and gained knowledge on:

By valuing and commercializing their intellectual property assets, pharmaceutical companies can generate revenue through licensing deals, partnerships, and other commercial arrangements. A strong intellectual property portfolio can give a pharmaceutical company a competitive advantage and increase its market share. IP valuation can provide pharmaceutical companies with a better understanding of the value of their intellectual property assets, making it easier to secure financing and investment.

By identifying potential risks and developing strategies to mitigate them, pharmaceutical companies can reduce their exposure to intellectual property-related risks. A strong intellectual property portfolio can enhance the reputation and brand value of a pharmaceutical company, making it more attractive to investors, customers, and partners. By protecting their intellectual property assets, pharmaceutical companies can create a more favorable environment for innovation, which can lead to the development of new drugs and therapies.

Overall, IP valuation and commercialization can help pharmaceutical companies to create a more sustainable business model by maximizing the value of their intellectual property assets and protecting their innovations from infringement.

A Seminar on Health Services Research: Scope and Significance

07th-Feb - 2023

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D. This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- Enhanced understanding of the scope and significance of health services research.
- Proficiency in various research methodologies and data analysis techniques used in the field.
- Development of critical thinking skills to evaluate healthcare delivery systems and identify areas for improvement.
- Insight into the impact of health services research on healthcare policy-making and improving patient outcomes.
- Networking opportunities and collaborations with professionals in the field of health services research.
- Ability to contribute to the field through the design and implementation of high-quality research studies.
- Understanding of ethical considerations and responsible conduct in health services research.
- Preparation for pursuing further academic and professional opportunities in health services research.

Resource Person:

Dr. CH. Prasad,
M. Pharm., Ph.D
Associate Professor,
Dept. of Pharmaceutical Chemistry,
Pydah College of Pharmacy, East
Godavari, AP

Last date to Registration: 04-02-2023

Objectives of the program:

- To provide guidance and support to individuals interested in health services research.
- To enhance participants' understanding of the scope and significance of health services research.
- To explore various research methodologies and approaches used in health services research.
- To foster critical thinking skills and analytical abilities in evaluating healthcare delivery systems.
- To understand the impact of health services research on policy-making and healthcare outcomes.
- To promote collaboration and networking opportunities within the field of health services research.

Topics to be covered:

- Introduction to Health Services Research
- Research Methodologies in Health Services Research
- Quantitative and Qualitative Data Analysis in Health Services Research
- Study Designs in Health Services Research
- Healthcare Delivery Systems and Organization
- Health Economics and Financing
- Health Policy and Decision-Making
- Patient-Centered Outcomes Research.

PROGRAM REPORT

Program Name	A Seminar on Health Services Research: Scope and Significance
Resource Person	Dr. CH. Prasad , Associate Professor, Dept. of Pharmaceutical Chemistry, Pydah College of Pharmacy, East Godavari, Andhra Pradesh Mail Id: cheepurupalli1982@gmail.com Mobile: 99124 41522
Date of Activity	07/02/2023
Organised By	Anurag Pharmacy College
Venue	Anurag Pharmacy College Seminar Hall

Objective of program:

1. To provide guidance and support to individuals interested in health services research.
2. To enhance participants' understanding of the scope and significance of health services research.
3. To explore various research methodologies and approaches used in health services research.
4. To foster critical thinking skills and analytical abilities in evaluating healthcare delivery systems.
5. To understand the impact of health services research on policy-making and healthcare outcomes.
6. To promote collaboration and networking opportunities within the field of health services research.

Topics covered:

1. Introduction to Health Services Research
2. Research Methodologies in Health Services Research
3. Quantitative and Qualitative Data Analysis in Health Services Research
4. Study Designs in Health Services Research

Awareness Program ON Legal Issues in Pharmaceuticals 28th Nov 2019

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Legal Issues in Pharmaceuticals.

- Legal issues in pharmaceuticals help to develop an understanding of the regulatory framework that governs the industry.
- Studying legal issues in pharmaceuticals helps to raise awareness of intellectual property rights and the importance of protecting them..
- Legal issues in pharmaceuticals provide insights into product liability concerns and the legal responsibilities of pharmaceutical companies in cases where their products cause harm to patients.
- Legal issues in pharmaceuticals help to develop an understanding of the regulations governing marketing and advertising of pharmaceutical products, including guidelines for marketing practices and the requirements for drug labeling.
- Legal issues in pharmaceuticals provide insights into the challenges associated with international trade and intellectual property protection, particularly in emerging markets.

Resource Person:

Mrs. P.A.M.Sucharitha,
Associate Professor,
Department of Pharmacognosy,
P.Rami Reddy Memorial College of
Pharmacy, Kadapa, Andhra Pradesh.

Last date to Registration: 27/11/2019

Objectives of the program:

- To ensure that pharmaceutical companies comply with regulations set by government agencies such as the FDA.
- Pharmaceutical companies invest heavily in research and development to create new drugs, and legal issues help to protect their intellectual property rights.
- Legal issues in pharmaceuticals also aim to address product liability concerns, which arise when a drug causes harm to a patient. This includes ensuring that drugs are properly tested and labeled, and that manufacturers are held accountable for any harm caused by their products.
- Legal issues in pharmaceuticals also aim to protect the rights of consumers, such as ensuring access to affordable medicines, protecting patient privacy, and promoting transparency in drug pricing and advertising.

Topics to be covered:

- Intellectual Property Law
- Regulatory Compliance
- Product Liability
- Marketing and Advertising,
- Pricing and Reimbursement
- Clinical Trials
- Data Privacy and Security

Outcome of the program

Our students and faculty had learned about Legal Issues in Pharmaceuticals and gained knowledge on:

Legal issues in pharmaceuticals help to develop an understanding of the regulatory framework that governs the industry. This includes learning about the role of regulatory bodies, such as the FDA, and the regulations that govern the approval, testing, and marketing of drugs. Studying legal issues in pharmaceuticals helps to raise awareness of intellectual property rights and the importance of protecting them. This includes learning about patents, trademarks, and copyrights, and their role in protecting pharmaceutical products and innovations.

Legal issues in pharmaceuticals provide insights into product liability concerns and the legal responsibilities of pharmaceutical companies in cases where their products cause harm to patients. Legal issues in pharmaceuticals help to develop an understanding of the regulations governing marketing and advertising of pharmaceutical products, including guidelines for marketing practices and the requirements for drug labeling. Legal issues in pharmaceuticals provide insights into the challenges and opportunities associated with international trade and intellectual property protection, particularly in emerging markets.

A one-day Seminar

on

Current Research Trends in Pharmaceutical Sciences

27 Jan 2023

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- Enhanced understanding of the latest developments and advancements in pharmaceutical sciences research.
- Proficiency in various research methodologies and techniques used in the field.
- Development of critical thinking skills to evaluate research findings and identify future research directions.
- Insight into the impact of current research trends on drug discovery, development, and delivery.
- Networking opportunities and collaborations with professionals in the field of pharmaceutical sciences research.
- Ability to contribute to the field through the design and implementation of high-quality research studies.

Resource Person:

Mr. Shaik Irfan Khan
M. Pharm., (Ph.D)
Asst. Professor,
Department of Pharmaceutics,
Nalanda College of Pharmacy, Nalgonda,
Telangana State

Last date to Registration: 24/01/2023

Objectives of the program:

- To provide guidance and support to individuals interested in current research trends in pharmaceutical sciences.
- To enhance participants' understanding of the latest developments and advancements in pharmaceutical research.
- To explore various research areas and methodologies in pharmaceutical sciences.
- To foster critical thinking skills and analytical abilities in evaluating research findings in the field.
- To understand the impact of current research trends on drug discovery, development, and delivery.
- To promote collaboration and networking opportunities within the field of pharmaceutical sciences research.

Topics to be covered:

- Introduction to Current Research Trends in Pharmaceutical Sciences
- Drug Discovery and Development
- Pharmacology and Toxicology
- Pharmaceutical Formulations and Drug Delivery Systems
- Biotechnology and Genetic Engineering in Pharmaceuticals
- Nanotechnology in Drug Delivery
- Pharmacogenomics and Personalized Medicine
- Pharmaceutical Analytical Techniques

PROGRAM REPORT

Program Name	A One-day Seminar on Current Research Trends in Pharmaceutical Sciences
Resource Person	Mr. Shaik Irfan Khan , Asst. Professor, Department of Pharmaceutics, Nalanda College of Pharmacy, Nalgonda, Telangana Mail Id: ikhanu65@anurag.edu.in Mobile: 99497 28619
Date of Activity	27/01/2023
Organised By	Anurag Pharmacy College
Venue	Anurag Pharmacy College Seminar Hall

Objective of program

1. To provide guidance and support to individuals interested in current research trends in pharmaceutical sciences.
2. To enhance participants' understanding of the latest developments and advancements in pharmaceutical research.
3. To explore various research areas and methodologies in pharmaceutical sciences.
4. To foster critical thinking skills and analytical abilities in evaluating research findings in the field.
5. To understand the impact of current research trends on drug discovery, development, and delivery.
6. To promote collaboration and networking opportunities within the field of pharmaceutical sciences research.

Topics covered

1. Introduction to Current Research Trends in Pharmaceutical Sciences
2. Drug Discovery and Development
3. Pharmacology and Toxicology
4. Pharmaceutical Formulations and Drug Delivery Systems
5. Biotechnology and Genetic Engineering in Pharmaceuticals

CERTIFICATE OF PARTICIPATION

This is to certify that**MOFIJUR RAHMAN**..... has participated as delegate in “A one-day Seminar on Current Research Trends in Pharmaceutical Sciences” held on 27th jan 2023 at Anurag Pharmacy College, Ananthagiri, Kodad.

Dr. B. Raja,
Convenor

Dr. M. Chinnaswaraiiah

Principal
ANURAG
Anurag Pharmacy College
Ananthagiri, KODAD, Suryapet

Registration

Registration fee is Rs.300/- including kit, e-souvenir, and participation certificate.

Objective

To encourage the students of Pharmacy to participate and present on latest happenings in Pharmaceutical Education and Research. It creates an academic and scientific platform for students to exchange their ideas and to prove their identity in the global pharmacy field.

Eligibility

Students of B. Pharm., M. Pharm., Pharm. D. and Research Scholars.

A One Day Seminar
on
Intellectual Property Rights for
Small and Medium-sized
Pharmaceutical Enterprises
3rd Jan 2023

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- The course will give knowledge about intellectual Property Rights can provide SMEs with protection for their innovative products, which can encourage them to invest in research and development activities, leading to more innovative products.
- Intellectual Property Rights can increase the market value of SMEs by providing them with a competitive advantage and attracting potential investors.
- IPRs can be monetized through licensing, selling, or leasing out to other companies, providing SMEs with a source of revenue to fund further research and development.
- Intellectual Property Rights can facilitate market access for SMEs by protecting their products, making them more attractive to investors, and enabling them to form collaborations with larger firms.
- IPRs give SMEs stronger negotiation power in negotiations with larger firms or investors, giving them the ability to negotiate favorable terms for partnerships or licensing agreements

Resource Person:

Dr.R.Manohar,
Professor,
Department of Pharmacology,
P.Ramireddy Memorial College of
Pharmacy, Kadapa, Andhra Pradesh.

Last date to Registration: 28-12-2022

Objectives of the program:

- Intellectual Property Rights provide protection to SMEs for their innovative products, processes, and technologies.
- IPRs can provide SMEs with a competitive advantage in the market by preventing others from copying or imitating their products or processes.
- IPRs can be monetized through licensing, selling or leasing out to other companies. SMEs can leverage their IPRs to generate revenue and fund further research and development activities.
- Intellectual Property Rights can facilitate market access for SMEs by providing a legal framework to protect their products, making them attractive to investors, and opening up opportunities for collaboration with larger firms.

Topics to be covered:

- Patents protect inventions,
- New products, processes, and technologies.
- Trademarks
- Copyrights
- Trade secrets
- Licensing
- Technology Transfer
- Enforcement

Outcome of the program

Our students and faculty had learned about Intellectual Property Rights for Small and Medium-sized Pharmaceutical Enterprises and gained knowledge on following areas:

- **Increased Innovation:** Intellectual Property Rights provide SMEs with protection for their innovative products, which can encourage them to invest in research and development activities, leading to more innovative products.
- **Increased Market Value:** Intellectual Property Rights can increase the market value of SMEs by providing them with a competitive advantage and attracting potential investors.
- **Revenue Generation:** IPRs can be monetized through licensing, selling, or leasing out to other companies, providing SMEs with a source of revenue to fund further research and development.
- **Better Market Access:** Intellectual Property Rights can facilitate market access for SMEs by protecting their products, making them more attractive to investors, and enabling them to form collaborations with larger firms.
- **Improved Negotiation Power:** IPRs give SMEs stronger negotiation power in negotiations with larger firms or investors, giving them the ability to negotiate favorable terms for partnerships or licensing agreements.

A One Day Awareness Program

on Intellectual Property Rights in Personalized Medicine

13th Dec 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- The course will give knowledge about encouraging innovation by providing inventors with the exclusive rights to their discoveries for a certain period of time.
- This can motivate companies and researchers to invest in research and development of personalized medicine products and to bring new products to the market.
- IPRs can promote access to new personalized medicine products by enabling licensing agreements that allow multiple companies to develop and market similar products.
- This can increase competition and lower prices, making personalized medicine products more accessible to patients.
- IPRs can attract investment in personalized medicine research and development by providing legal protection for the investments made by companies and investors

Resource Person:

Dr. D. Vasavi devi
M. Pharm., Ph.D
Associate Professor,
Department of Pharmaceutical Analysis,
P. Rami Reddy Memorial College of
Pharmacy, Kadapa, Andhra Pradesh.

Last date to Registration: 10-12-2022

Objectives of the program:

- IPRs can encourage researchers and companies to invest in research and development of personalized medicine by providing them with the exclusive rights to their discoveries for a certain period of time.
- IPRs can provide legal protection for the investments made by companies and investors in personalized medicine research and development.
- Ensuring quality: IPRs can help to ensure the quality of personalized medicine products by requiring the inventors to disclose the details of their discoveries, which can be scrutinized by regulatory authorities to ensure that the products are safe and effective.
- IPRs can facilitate collaboration between different companies and researchers by providing them with a framework to negotiate and enter into licensing agreements that can allow them to share their discoveries and develop new products

Topics to be covered:

- Overview of IPRs
 - Personalized Medicine
 - Patents and Personalized Medicine
 - Licensing Agreements and Ethical and Social Implications
 - Future of IPRs in Personalized Medicine
- with patent and trademark laws in the*

Outcome of the program

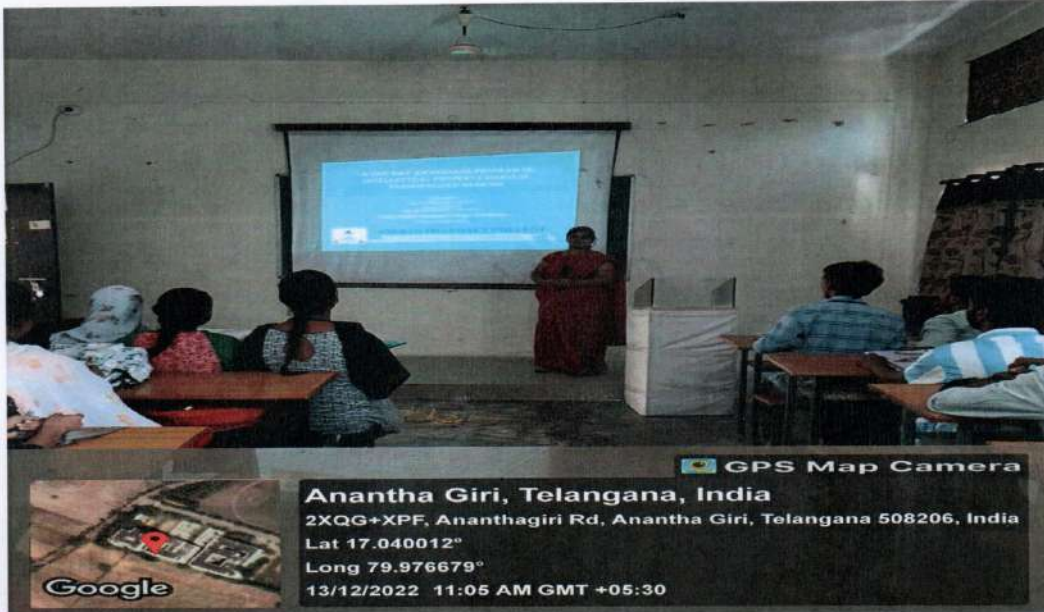

Our students and faculty had learned about Intellectual Property Rights in Personalized Medicine and gained knowledge on following areas:

- Increased innovation: IPRs can encourage innovation by providing inventors with the exclusive rights to their discoveries for a certain period of time. This can motivate companies and researchers to invest in research and development of personalized medicine products and to bring new products to the market.
- Improved access to new products: IPRs can promote access to new personalized medicine products by enabling licensing agreements that allow multiple companies to develop and market similar products. This can increase competition and lower prices, making personalized medicine products more accessible to patients.
- Increased investment: IPRs can attract investment in personalized medicine research and development by providing legal protection for the investments made by companies and investors. This can ensure that the companies and investors can recoup their investments and have the financial incentives to continue developing new products.

A one-day Seminar
on
Principles of Pharmacological Research
of Nutraceuticals
29th Nov 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as most of the drugs are now manufactured by pharmaceutical industries.

About the Programme:

- The purpose of the seminar is to introduce students and faculty about principles of Pharmacological research of nutraceuticals. They gain the knowledge on:
 - Introduction to Nutraceuticals: Definition, classification, and regulatory aspects.
 - Pharmacological Research Methodologies: In vitro studies, animal models, clinical trials, and epidemiological studies.
 - Pharmacokinetics and Pharmacodynamics of Nutraceuticals: Absorption, distribution, metabolism, and excretion.
 - Mechanisms of Action: Molecular targets, signaling pathways, and gene expression modulation.
 - Safety and Toxicology Assessment: Dose-response relationships, toxicity studies, and risk assessment.

Resource Person:

M. Ravi Kumar Vemulapally,
M. Pharm., (Ph.D)
Assoc. Professor,
Department of Pharmacology,
MNR College of Pharmacy, Sanga Reddy,
Telangana State

Last date to Registration: 26/11/2022

Objectives of the program:

- To provide guidance and support to individuals interested in conducting pharmacological research on nutraceuticals.
- To enhance participants' understanding of the principles and methodologies of pharmacological research in the context of nutraceuticals.
- To explore various experimental techniques and approaches used in studying the pharmacology of nutraceutical compounds.
- To foster critical thinking skills and analytical abilities in evaluating the safety, efficacy, and mechanisms of action of nutraceuticals.
- To understand the impact of nutraceutical research on human health, disease prevention, and wellness.

Topics to be covered:

- Introduction to Nutraceuticals:
- Pharmacological Research Methodologies
- Pharmacokinetics and Pharmacodynamics of Nutraceuticals
- Mechanisms of Action
- Safety and Toxicology Assessment
- Bioavailability and Formulation
- Efficacy Evaluation
- Nutraceuticals in Disease Prevention and Management

**A One Day Seminar on
Patent and Trademark Law in
Pharmacy Industry**

03rd Oct 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- The course will give knowledge about increased awareness and understanding of patent and trademark law in the pharmacy industry among stakeholders, including industry professionals, policymakers, and legal professionals.
- Identification of emerging issues and challenges in patent and trademark law in the pharmacy industry, and exploration of possible solutions and strategies to address them.
- Enhanced collaboration and networking among stakeholders involved in patent and trademark law in the pharmacy industry, including academia, industry, policymakers, and legal professionals.
- Development of recommendations and policy proposals to improve the legal framework governing the protection of intellectual property rights in the pharmacy industry.

Resource Person:

Dr.S. Nelson Kumar,
Professor & Principal,
P.Ramireddy Memorial College of
Pharmacy, Kadapa, Andhra Pradesh.

Last date to Registration: 01-10-2022

Objectives of the program:

- Create awareness about the importance of patent and trademark law in the pharmacy industry
- Sharing the latest developments and best practices in patent and trademark law in the pharmacy industry
- Enhance the understanding of the legal framework governing the protection of intellectual property rights in the pharmacy industry
- Explore strategies and approaches to effectively protect and enforce patents and trademarks in the pharmacy industry
- Identify and discuss the emerging issues and challenges in patent and trademark law in the pharmacy industry, and explore possible solutions and strategies to address them.

Topics to be covered:

- Overview of patent and trademark laws in the pharmacy industry
- Intellectual property protection for pharmaceuticals and biologics
- Patent term extension and data exclusivity
- Generic drug approval and litigation under the Hatch-Waxman Act
- FDA regulation of pharmaceutical products and intellectual property considerations

A One Day Seminar on
on
Role of Technology in the Pharma Industry
and Its Impact on Entrepreneurship
23rd August 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- The course will give knowledge about the role of technology in the pharma industry and its impact on entrepreneurship.
- Technology can help streamline the drug discovery and development process, resulting in more efficient and cost-effective research and development.
- Technology can enable new ways of developing drugs, leading to more innovative products and new treatment options for patients.
- Technology can improve patient care by enabling better diagnosis, treatment, and monitoring of diseases, leading to improved health outcomes.
- Technology can enable new business models, such as telemedicine or direct-to-consumer drug sales, which can disrupt traditional models and create new opportunities for entrepreneurs.
- Technology can lower the barriers to entry for new companies, enabling greater competition and potentially leading to more affordable and accessible drugs for patients.

Resource Person:

Dr. Niranjana Panda,
Professor
Department of Pharmaceutics,
Anwarul Uloom College of Pharmacy,
Hyderabad.

Last date to Registration: 22-08-2022

Objectives of the program:

- Technology can make it easier for new companies to enter the market and compete with established players.
- Technology can enable new ways of discovering and developing drugs, leading to more innovative products.
- Technology can enable new business models, such as telemedicine or direct-to-consumer drug sales, which can disrupt traditional models and create new opportunities for entrepreneurs.
- Technology can facilitate collaboration between entrepreneurs, researchers, and other stakeholders, leading to new partnerships and innovation.
- Technology can enable entrepreneurs to access capital more easily, through crowd funding or other digital platforms.

Topics to be covered:

- Technology in the Pharma Industry
- Impact of Technology on Entrepreneurship
- Examples of Technology in the Pharma Industry
- Challenges and Opportunities for Entrepreneurs
- Future Trends and Directions

A One Day Seminar on Intellectual Property Rights in Drug Delivery Systems 04th Aug 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Intellectual Property Rights in Drug Delivery Systems.

- Strong IP protection can incentivize pharmaceutical companies to invest in research and development of new drug delivery systems, leading to the creation of new and innovative technologies that can improve patient outcomes.
- Strong IP protection ensures that pharmaceutical companies can protect their investment in drug delivery systems by preventing others from copying or using their inventions without permission, leading to more secure and predictable financial returns.
- IP protection can lead to the development of drug delivery systems that are more efficient, effective, and safe, improving patient outcomes and quality of life.
- The pharmaceutical industry is a significant contributor to economic growth. Strong IP protection can attract investment and foster innovation, leading to the creation of jobs and economic growth.

Resource Person:

Mrs. T. Kavitha,
M. Pharm,
Department of Pharmaceutics,
Khammam College of Pharmacy,
Khammam, Telangana.

Last date to Registration: 03/08/2022

Objectives of the program:

- IP protection provides an incentive for pharmaceutical companies to invest in research and development of new drug delivery systems.
- IP protection ensures pharmaceutical companies can protect their investment in drug delivery systems by preventing others from copying their inventions without permission.
- Ensuring safety and efficacy of drug delivery systems by ensuring that only properly tested and approved systems are available on the market.
- IP protection offers exclusive rights to the inventor and promotes competition by providing a limited monopoly.
- Improving patient access to encourage the development of drug delivery systems that are more efficient, effective, and affordable, improving patient access to necessary medications.

Topics to be covered:

- IP protection for drug delivery systems
- Branding and identity of drug delivery systems
- Type of IP protection for formula a new drug delivery system
- Enforcement and litigation
- Regulatory issues in Drug delivery systems by government agencies

Outcome of the program

Our students and faculty had learned about Intellectual Property Rights in Drug Delivery Systems and gained knowledge on following areas:

Strong IP protection can incentivize pharmaceutical companies to invest in research and development of new drug delivery systems, leading to the creation of new and innovative technologies that can improve patient outcomes.

Strong IP protection ensures that pharmaceutical companies can protect their investment in drug delivery systems by preventing others from copying or using their inventions without permission, leading to more secure and predictable financial returns.

While IP protection offers exclusive rights to the inventor or innovator, it also promotes competition by providing a limited monopoly. This encourages other companies to develop their own drug delivery systems, leading to better products and more choices for consumers.

IP protection can lead to the development of drug delivery systems that are more efficient, effective, and safe, improving patient outcomes and quality of life.

The pharmaceutical industry is a significant contributor to economic growth. Strong IP protection can attract investment and foster innovation, leading to the creation of jobs and economic growth.

Awareness Program on Intellectual Property Issues in Medical Devices 23rd June 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Intellectual Property Issues in Medical Devices.

- Strong IP protection can incentivize medical device companies to invest in research and development, leading to the creation of new and innovative medical devices.
- IP protection can ensure that only safe and effective medical devices are available to the public, preventing the circulation of counterfeit or substandard products that could harm patients.
- While IP protection offers exclusive rights to the inventor or innovator, it also promotes competition by providing a limited monopoly. This encourages other companies to develop their own medical devices, leading to better products and more choices for consumers.
- Strong IP protection can attract investment in the medical device industry, leading to the development of new technologies and devices that can save lives and improve patient outcomes.

Resource Person:

Mrs. B. Leena,
M. Pharm,
Assistant Professor,
Department of Pharmacology,
Browns College of Pharmacy, Khammam,
Telangana.

Last date to Registration: 22/06/2022

Objectives of the program:

- Intellectual property (IP) laws provide protection to innovators and inventors of medical devices, ensuring that their creations are not copied or stolen without permission.
- IP protection ensures that only safe and effective medical devices are available to the public, preventing the circulation of counterfeit or substandard products.
- Strong IP protection can attract investment in the medical device industry, leading to the development of new technologies and devices that can save lives and improve patient outcomes.
- IP protection offers exclusive rights to the inventor or innovator, it also promotes competition by providing a limited monopoly.
- Medical device companies invest heavily in research and development.

Topics to be covered:

- IP protection for medical devices
- Branding and identity of medical devices,
- Copyrights
- Trade secrets
- Licensing and agreements of medical device companies
- Enforcement and litigation

Outcome of the program

Our students and faculty had learned about Intellectual Property Issues in Medical Devices and gained knowledge on following areas:

Strong IP protection can incentivize medical device companies to invest in research and development, leading to the creation of new and innovative medical devices.

IP protection can ensure that only safe and effective medical devices are available to the public, preventing the circulation of counterfeit or substandard products that could harm patients.

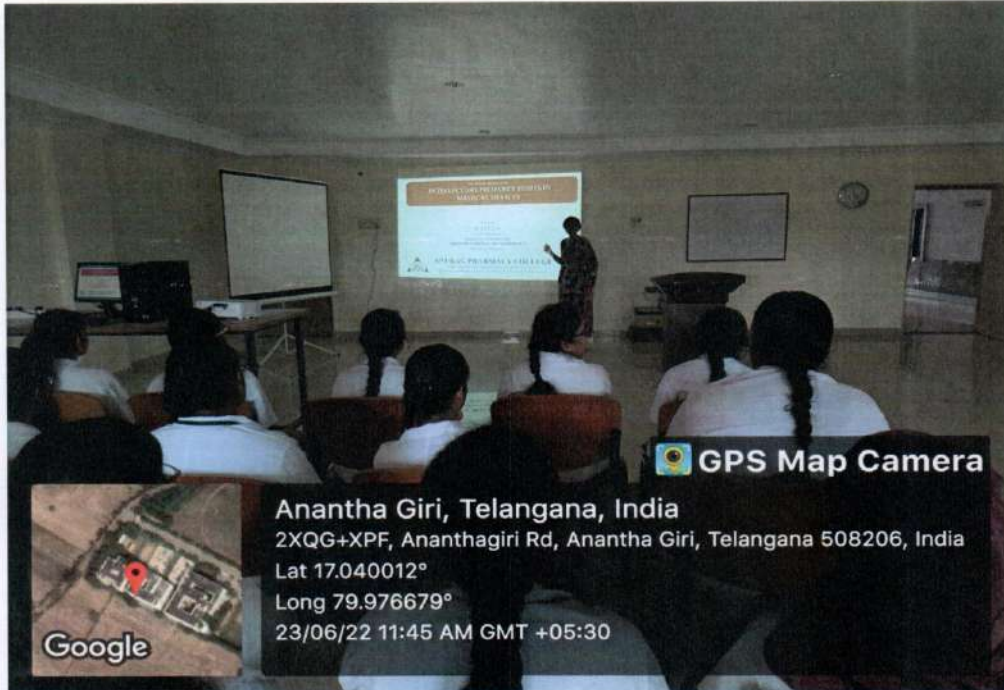

While IP protection offers exclusive rights to the inventor or innovator, it also promotes competition by providing a limited monopoly. This encourages other companies to develop their own medical devices, leading to better products and more choices for consumers.

Strong IP protection can attract investment in the medical device industry, leading to the development of new technologies and devices that can save lives and improve patient outcomes.
