A One Day Seminar on Pharma Entrepreneur- Solving the Drug Shortage Crisis 06th May 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- The course will give knowledge about investing in the development and manufacturing of drugs, pharmaentrepreneurs can help to increase the supply of drugs and reduce the likelihood of shortages. This can lead to improved access to essential medications for patients, particularly those with chronic or life-threatening conditions.
- Entrepreneurship in the pharmaceutical industry can drive innovation and the development of new drugs. By investing in research and development, pharmaentrepreneurs can create new treatments that are more effective and have fewer side effects than existing drugs.
- The pharmaceutical industry is a significant contributor to the global economy, and entrepreneurship in this industry can lead to economic growth. By creating new businesses and jobs, pharmaentrepreneurs can contribute to local and national economies.

Resource Person:

Dr. Byasabhusan Das,
Professor,
Department of Pharmaceutical Analysis,
Anwarul Uloom College of Pharmacy,
Hyderabad

Last date to Registration: 04-05-2022

Objectives of the program:

- The primary objective of a pharmaentrepreneur in addressing the drug shortage crisis is to develop and manufacture drugs to increase the supply and ensure that patients have access to essential medications.
- A pharmaentrepreneur may focus on improving supply chain management to prevent drug shortages from occurring. This could involve investing in logistics and inventory management systems to ensure that there is a consistent supply of drugs.
- A pharmaentrepreneur may also focus on finding new solutions to address drug shortages. This could involve investing in research and development to create new drugs, reformulating existing drugs, or finding alternative sources of drugs.
- Collaboration with stakeholders in the pharmaceutical industry, including regulators, manufacturers, and distributors, can be another objective of pharmaentrepreneurship.

Topics to be covered:

- Identifying opportunities
- Developing innovative drugs
- Improving manufacturing processes
- Marketing and sales
- Financial management

Outcome of the program

Our students and faculty had learned about Pharma Entrepreneur-solving the Drug Shortage Crisis and gained knowledge on following areas:

By investing in the development and manufacturing of drugs, Pharma entrepreneurs can help to increase the supply of drugs and reduce the likelihood of shortages. This can lead to improved access to essential medications for patients, particularly those with chronic or life-threatening conditions.

Entrepreneurship in the pharmaceutical industry can drive innovation and the development of new drugs. By investing in research and development, Pharma entrepreneurs can create new treatments that are more effective and have fewer side effects than existing drugs.

The pharmaceutical industry is a significant contributor to the global economy, and entrepreneurship in this industry can lead to economic growth. By creating new businesses and jobs, Pharma entrepreneurs can contribute to local and national economies.

By addressing the drug shortage crisis, Pharma entrepreneurs can help to improve public health outcomes. Patients who have access to essential medications are more likely to manage their conditions effectively, leading to improved health outcomes and a better quality of life.

**A Seminar on
RESEARCH METHODOLOGY**

20th April 2022

Research Methodology

QUESTION: GENERATE IDEAS: ORGANIZE YOUR IDEAS: THESIS:

Ask a research question. This then focuses your research.	Brainstorm how you will answer the question using methods presented.	Remember the key to a methodology is that another person must be able to follow the steps you took in doing your research.	Your research should answer your question—from this you have your thesis statement.

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- Research is a systematic investigation into and study of materials and sources in order to establish facts and reach new conclusions
- Research methodology refers to the techniques used to find and analyze information for a study
- It is essential for scholars, students etc,
- This will helps to students, scholars to understand various principles, methods and tools of research
- It creates knowledge in writing research articles
- ability to choose methods appropriate to research aims and objectives
- Explain key research concepts and issues
- Read, comprehend, and explain research articles in their academic discipline.

Resource Person:

Mr. D. Appala Raju,
M. Pharm., (Ph.D)
Assoc. Professor,
Department of Pharmaceutics,
Pydah College of Pharmacy, East
Godavari, Andhra Pradesh

Last date to Registration: 18/04/2022

Objectives of the program:

- The purpose of a research methodology is to explain the reasoning behind your approach to your research
- Identify appropriate research topics
- Select and define appropriate research problem and parameters
- Prepare a project proposal (to undertake a project)
- Organize and conduct research (advanced project) in a more appropriate manner
- Write a research report and thesis
- Write a research proposal (grants)

Topics to be covered:

- Overview of Research and its Methodologies
- Concepts of research and the need for research
- Types of research and steps in conducting research
- Literature review and selecting and defining a research problem
- Conducting the research and writing Research Reports and Thesis
- Writing Research Proposals

A One Day Seminar on Intellectual Property and Licensing Agreements in Pharmaceutical Industry 05th April 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Intellectual Property and Licensing Agreements in Pharmaceutical Industry.

- Participants in the program can gain a deeper understanding of the legal and business aspects of IP and licensing in the pharmaceutical industry, including the key concepts and principles, best practices, and current trends and issues.
- The program can help participants develop and enhance their skills and competencies related to IP and licensing, including negotiation, drafting, and interpretation of licensing agreements, as well as strategic planning and risk management.
- The program can provide opportunities for participants to network and collaborate with other professionals in the pharmaceutical industry, including experts in IP law, licensing, business development, and regulatory affairs.
- By improving their understanding and skills in IP and licensing, participants can enhance their competitiveness

Resource Person:

Ms. Y. Sushma,
M. Pharm,
Assistant Professor,
Department of Pharmacognosy,
G.Pulla Reddy College of Pharmacy,
Hyderabad, Telangana.

Last date to Registration: 02/04/2022

Objectives of the program:

- To safeguard the investments made by companies in research and development of new drugs, this can take years and cost billions of dollars.
- To monetize their IP assets by granting licenses to other companies to use their technology in exchange for royalties or other forms of compensation.
- Facilitate collaboration and joint ventures between companies that have complementary technology or expertise.
- Enable companies to access new markets by partnering with local companies that have a better understanding of the regulatory and cultural environment in those markets.
- To mitigate the risks associated with drug development by sharing the costs and risks of research and development with other companies.

Topics to be covered:

- Patents
- Confidentiality and Non-Disclosure
- License Grants and Restrictions
- Royalties and Compensation
- Termination and Renewal
- Dispute Resolution
- Representations and Warranties
- Governing Law and Jurisdiction

Awareness Program on Intellectual Property Rights in Biopharmaceuticals 9th March 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Intellectual Property Rights in Biopharmaceuticals.

- IPR provides incentives for drug manufacturers to invest in the development of new and innovative drugs, leading to advances in medicine and improved patient outcomes.
- IPR helps to ensure the quality and safety of drugs by providing a legal framework for the protection and enforcement of intellectual property rights, preventing the production and distribution of counterfeit or substandard drugs.
- IPR can facilitate the transfer of technology and knowledge between different countries, allowing for the development of new drugs in areas with limited resources.
- IPR can ensure equitable access to medicines by promoting the development and distribution of drugs to areas with unmet medical needs, including developing countries.

Resource Person:

Dr. S. MS Nikhil,
Assistant Professor
Department of Pharmacy Practice,
Vikas College of Pharmaceutical Sciences,
Suryapet, Telangana.

Last date to Registration: 08/03/2022

Objectives of the program:

- To provide exclusive rights to the inventor of a new drug, IPR encourages investment in research and development, leading to the creation of new and innovative drugs.
- To provide a mechanism for recovering the costs of research and development, this can be substantial for biopharmaceuticals.
- To encourage competition among drug manufacturers by granting exclusive rights to the inventor or creator for a limited period of time, after which the drug becomes available for generic production.
- To ensure the inventor of a drug has the exclusive right to produce, market, and profit from the drug, protecting their investment in research and development.
- To promote the transfer of technology and knowledge between different countries, allowing for the development of new drugs in areas with limited resources.

Topics to be covered:

- IPR in biopharmaceuticals
- Trademarks
- Copyrights
- Trade secrets
- Licensing agreements
- Regulatory exclusivity
- Infringement
- International agreements

Outcome of the program

Our students and faculty had learned about Intellectual Property Rights in Biopharmaceuticals and gained knowledge on following areas:

IPR provides incentives for drug manufacturers to invest in the development of new and innovative drugs, leading to advances in medicine and improved patient outcomes. IPR helps to ensure the quality and safety of drugs by providing a legal framework for the protection and enforcement of intellectual property rights, preventing the production and distribution of counterfeit or substandard drugs.

IPR can facilitate the transfer of technology and knowledge between different countries, allowing for the development of new drugs in areas with limited resources.

IPR can ensure equitable access to medicines by promoting the development and distribution of drugs to areas with unmet medical needs, including developing countries.

Overall, the outcomes of IPR in biopharmaceuticals can have significant and far-reaching impacts on the development, availability, and affordability of drugs, as well as on the health and well-being of patients and society as a whole.

A PROGRAM
ON
BE A YOUNG SOCIAL ENTREPRENEUR
11th Feb 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about young social entrepreneur.

- The primary outcome of being a young social entrepreneur is creating positive social impact by addressing social or environmental problems and making a difference in the lives of people and communities.
- Young social entrepreneurs can promote sustainable development by implementing solutions that are economically, socially, and environmentally sustainable.
- Young social entrepreneurs can empower communities by providing resources, creating jobs, and enabling community members to participate in decision-making.
- Young social entrepreneurs can encourage innovation by creating new products, services, or business models that address social or environmental problems in creative ways.
- Young social entrepreneurs can promote social entrepreneurship as a viable and impactful career path for young people.

Resource Person:

K. Harish Kumar
Soft Skill Trainer
Rubicon Foundation

Last date to Registration: 10/02/2022

Objectives of the program:

- One of the primary objectives of being a young social entrepreneur is to create a positive social impact.
- Young social entrepreneurs may focus on promoting sustainable development by implementing solutions that are economically, socially, and environmentally sustainable.
- Young social entrepreneurs may aim to empower communities by providing resources, creating jobs, and enabling community members to participate in decision-making.
- Young social entrepreneurs may aim to encourage innovation by creating new products, services, or business models that address social or environmental problems in creative ways.
- Young social entrepreneurs may aim to promote social entrepreneurship as a viable and impactful career path for young people.

Topics to be covered:

- Understanding social entrepreneurship
- Identifying social or environmental problems
- Creating a social enterprise
- Business models for social enterprises
- Innovation and creativity in social entrepreneurship
- Scaling social enterprises

A One Day Seminar on Pharmacovigilance and Intellectual Property Rights 29th Jan 2022

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Pharmacovigilance and Intellectual Property Rights.

- Improved patient safety and health outcomes through the identification and management of adverse drug reactions (ADRs).
- Enhanced regulatory compliance and adherence to pharmacovigilance guidelines and regulations and improved understanding of the safety and efficacy of drugs and their risks and benefits
- Identification of new safety concerns or risks associated with drugs and other medical products and improved public health through the timely detection and management of safety issues and protection of pharmaceutical companies' investment in research and development
- Encouragement of innovation and the development of new drugs and medical products and increased revenue and market share through the commercialization of patented drugs

Resource Person:

Mrs. N. Amani,
M. Pharm,
Assistant Professor,
Department of Pharmacology,
Madhira Institute of Technology &
Sciences, Kodad, Telangana.
Last date to Registration: 27/01/2022

Objectives of the program:

- The main objective of pharmacovigilance is to monitor the safety of medicines and vaccines throughout their life cycle, from pre-market clinical trials to post-market surveillance.
- The goal is to identify and minimize the risks associated with the use of medicines, and to ensure that their benefits outweigh their potential harms.
- Both pharmacovigilance and IPRs have the ultimate goal of promoting public health by ensuring the availability of safe and effective medicines.
- Encouraging innovation by identifying potential safety issues early on in the development process.
- Both pharmacovigilance and IPRs seek to balance public health concerns with commercial interests, ensuring that innovative medicines are developed while also minimizing risks to public health.

Topics to be covered:

- Safety monitoring of medicines
- Intellectual property protection for pharmaceuticals
- Data exclusivity
- Patent law and pharmacovigilance
- Patentability and patent infringement
- Risk management plans

Mobile: 9553122271. Email: principal.pharmacy@anurag.ac.in
Website: www.anuragpharmacy.ac.in

Outcome of the program

Our students and faculty had learned about Pharmacovigilance and Intellectual Property Rights and gained knowledge on:

Improved patient safety and health outcomes through the identification and management of adverse drug reactions (ADRs).

Enhanced regulatory compliance and adherence to pharmacovigilance guidelines and regulations and improved understanding of the safety and efficacy of drugs and their risks and benefits

Identification of new safety concerns or risks associated with drugs and other medical products and improved public health through the timely detection and management of safety issues and protection of pharmaceutical companies' investment in research and development

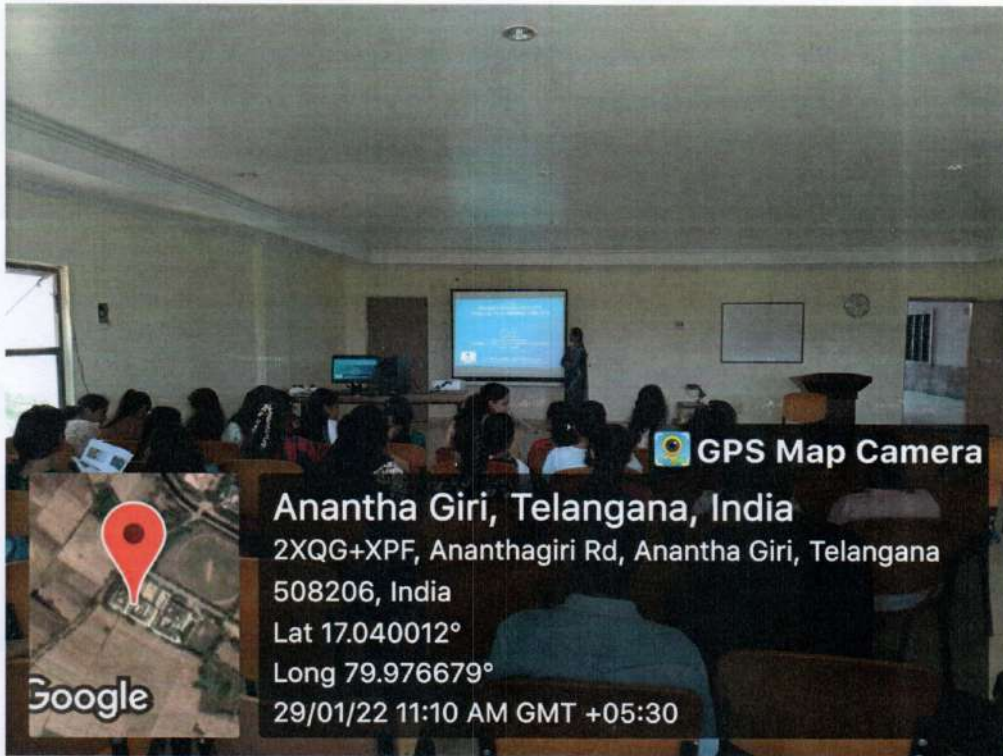

Encouragement of innovation and the development of new drugs and medical products and increased revenue and market share through the commercialization of patented drugs

When implemented together, Pharmacovigilance and IPR programs can work synergistically to improve patient safety while also promoting innovation and investment in the pharmaceutical industry. For example, Pharmacovigilance data can be used to support patent applications and defend against patent infringement claims, while patent protection can facilitate the commercialization of innovative drugs and medical products.

A SEMINAR ON ROLE OF PHARMACEUTICAL EDUCATION IN NANO-SCIENCE RESEARCH 10th Dec 2021

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

- Gain a comprehensive understanding of the role of pharmaceutical education in nano-science research.
- Recognize the potential of nanotechnology in revolutionizing pharmaceutical research and development.
- Identify the applications of nanoscience in drug delivery systems and formulations.
- Understand the importance of safety and regulatory considerations in pharmaceutical nanotechnology.
- Explore the ethical implications and societal impact of nano-based pharmaceutical products.
- Foster interdisciplinary collaboration and communication between pharmaceutical scientists and nanotechnology researchers.
- Develop a broader perspective on the future directions of pharmaceutical education and its integration with emerging technologies like nanoscience.

Resource Person:

K. Kavitha,
M. Pharm.,
Asst. Professor,
Department of Pharmacology,
Chalapathi Institute of Pharmaceutical
Sciences, Guntur, Andhra Pradesh.

Last date to Registration: 08/12/2021

Objectives of the program:

- To understand the role of pharmaceutical education in advancing nano-science research.
- To explore the intersection of pharmaceutical sciences and nanotechnology.
- To discuss the importance of integrating nano-science research into pharmaceutical education.
- To highlight the potential applications and benefits of nano-science in pharmaceutical research and development.
- To foster an interdisciplinary approach and encourage collaboration between pharmaceutical scientists and nanotechnology researchers.

Topics to be covered:

- Introduction to nano-science and nanotechnology.
- Overview of pharmaceutical education and its traditional focus.
- Nanotechnology in drug delivery systems.
- Nano-formulations and their significance in improving drug solubility, stability, and bioavailability.
- Nanomaterials and their applications in pharmaceutical research.
- Nanotoxicology and safety considerations in pharmaceutical nanotechnology.
- Role of nanotechnology in personalized medicine and targeted drug delivery.

PROGRAM REPORT

Program Name	A Seminar on Role of Pharmaceutical education in Nano-science Research
Resource Person	K. Kavitha , Asst. Professor, Department of Pharmacology, Chalapathi Institute of Pharmaceutical Sciences, Guntur, Andhra Pradesh. Mail id: kumpatikavitha77@gmail.com: Mobile No: 77299 39928
Date of Activity	10/12/2021
Organised By	Anurag Pharmacy College
Venue	Anurag Pharmacy College Seminar Hall

Objective of program

1. To understand the role of pharmaceutical education in advancing nano-science research.
2. To explore the intersection of pharmaceutical sciences and nanotechnology.
3. To discuss the importance of integrating nano-science research into pharmaceutical education.
4. To highlight the potential applications and benefits of nano-science in pharmaceutical research and development.
5. To foster an interdisciplinary approach and encourage collaboration between pharmaceutical scientists and nanotechnology researchers.

Topics covered

1. Introduction to nano-science and nanotechnology.
2. Overview of pharmaceutical education and its traditional focus.
3. Nanotechnology in drug delivery systems.
4. Nano-formulations and their significance in improving drug solubility, stability, and bioavailability.
5. Nanomaterials and their applications in pharmaceutical research.
6. Nanotoxicology and safety considerations in pharmaceutical nanotechnology.
7. Role of nanotechnology in personalized medicine and targeted drug delivery.

A One Day Seminar on Intellectual Property Rights and Access to Medicine 23rd Nov 2021

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Intellectual Property Rights and Access to Medicine.

- The granting of exclusive rights to inventors and developers of new drugs can provide a financial incentive to invest in research and development.
- Access to essential medicines can be improved through measures such as compulsory licensing and parallel imports, which allow generic versions of drugs to be produced and sold at a lower cost.
- Initiatives aimed at increasing access to medicines in developing countries, such as the World Health Organization's Essential Medicines List and the Medicines Patent Pool, can help to ensure that people in these countries have access to affordable and effective medicines.
- IPRs and Access to Medicine are complex and depend on a variety of factors, including the specific policies and initiatives in place, as well as the political and economic context in which they are implemented.

Resource Person:

Ms. K. Sree Latha,
M. Pharm,
Assistant Professor,
Department of Pharmaceutical Chemistry,
Sana College of Pharmacy, Kodad,
Telangana.

Last date to Registration: 22/11/2021

Objectives of the program:

- To encourage innovation and research in the pharmaceutical industry by granting exclusive rights to inventors and developers of new drugs.
- To ensure that people have access to affordable and effective medicines, particularly in developing countries where the cost of healthcare can be prohibitively high.
- To ensure that these exclusive rights do not hinder access to essential medicines, such as compulsory licensing or parallel imports, which allow generic versions of drugs to be produced and sold at a lower cost.
- Aimed at increasing access to medicines in developing countries, such as the WHO Essential Medicines List, which identifies the most important medicines needed in a health system and promotes their availability at affordable prices.

Topics to be covered:

- Patent law and its impact on access to medicines
- Compulsory licensing and parallel imports
- International trade agreements and intellectual property
- Access to medicines in developing countries
- Biotechnology and intellectual property
- Public health and intellectual property

PROGRAM REPORT

Program Name	A One Day Seminar on Intellectual Property Rights and Access to Medicine
Resource Person	Ms. K. Sree Latha, Assistant Professor, Department of Pharmaceutical Chemistry, Sana College of Pharmacy, Kodad, Telangana.
Date of Activity	23/11/2021
Organised By	Anurag Pharmacy College
Venue	Anurag Pharmacy College

Objective of program

- To encourage innovation and research in the pharmaceutical industry by granting exclusive rights to inventors and developers of new drugs.
- To ensure that people have access to affordable and effective medicines, particularly in developing countries where the cost of healthcare can be prohibitively high.
- To ensure that these exclusive rights do not hinder access to essential medicines, such as compulsory licensing or parallel imports, which allow generic versions of drugs to be produced and sold at a lower cost.
- Aimed at increasing access to medicines in developing countries, such as the WHO Essential Medicines List, which identifies the most important medicines needed in a health system and promotes their availability at affordable prices.
- To balance the needs of both innovation and public health, ensuring that new medicines are developed while also making them accessible to those who need them most.

Topics covered

- Patent law and its impact on access to medicines
- Compulsory licensing and parallel imports
- International trade agreements and intellectual property
- Access to medicines in developing countries
- Biotechnology and intellectual property
- Public health and intellectual property

A One Day Seminar
on
Intellectual Property and
Regulatory Affairs in
Pharma industry
06th Oct 2021

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about Intellectual Property and Regulatory Affairs in Pharma industry.

- Intellectual Property (IP) protection is crucial for the pharmaceutical industry.
- Regulatory Affairs (RA) is a complex and constantly evolving field, and understanding and complying with regulatory requirements is essential for successfully developing and commercializing new drugs.
- Collaboration between companies, research institutions, and regulatory authorities is crucial for the development and approval of new drugs, and for ensuring to meet regulatory requirements.
- Risk management is essential for identifying and mitigating potential risks associated with new drugs.
- The pharmaceutical industry operates in a global market, and navigating regulatory requirements in different countries and regions can be challenging.

Resource Person:

Ms. K. Kavitha,
M. Pharm,
Assistant Professor,
Department of Pharmacology,
Chalapathi Institute of Pharmaceutical Sciences, Guntur, Andhra Pradesh.

Last date to Registration: 05/10/2021

Objectives of the program:

- Protecting the innovations and inventions that drive pharmaceutical research and development, including drugs, vaccines, and medical devices, through patents, trademarks, and copyrights.
- Providing a legal framework for licensing and transferring intellectual property between companies, research institutions, and investors.
- Establishing a competitive advantage for pharmaceutical companies by enabling them to differentiate their products from those of their competitors and secure market exclusivity.
- Encouraging investment in research and development by providing a mechanism for companies to recoup their investments and earn a return on their intellectual property.

Topics to be covered:

- Intellectual Property
- Regulatory Affairs
- Combination products
- Global regulatory affairs
- Biologics
- Risk management

Outcome of the program

Our students and faculty had learned about Intellectual Property and Regulatory Affairs in Pharma industry and gained knowledge on:

Intellectual Property (IP) protection is crucial for the pharmaceutical industry, as it provides companies with the ability to recoup their research and development investments, and fosters innovation by incentivizing new discoveries.

Regulatory Affairs (RA) is a complex and constantly evolving field, and understanding and complying with regulatory requirements is essential for successfully developing and commercializing new drugs.

RA plays a critical role in ensuring the safety and efficacy of new drugs, which is essential for protecting public health and building trust in the pharmaceutical industry.

Collaboration between companies, research institutions, and regulatory authorities is crucial for the development and approval of new drugs, and for ensuring that they meet regulatory requirements.

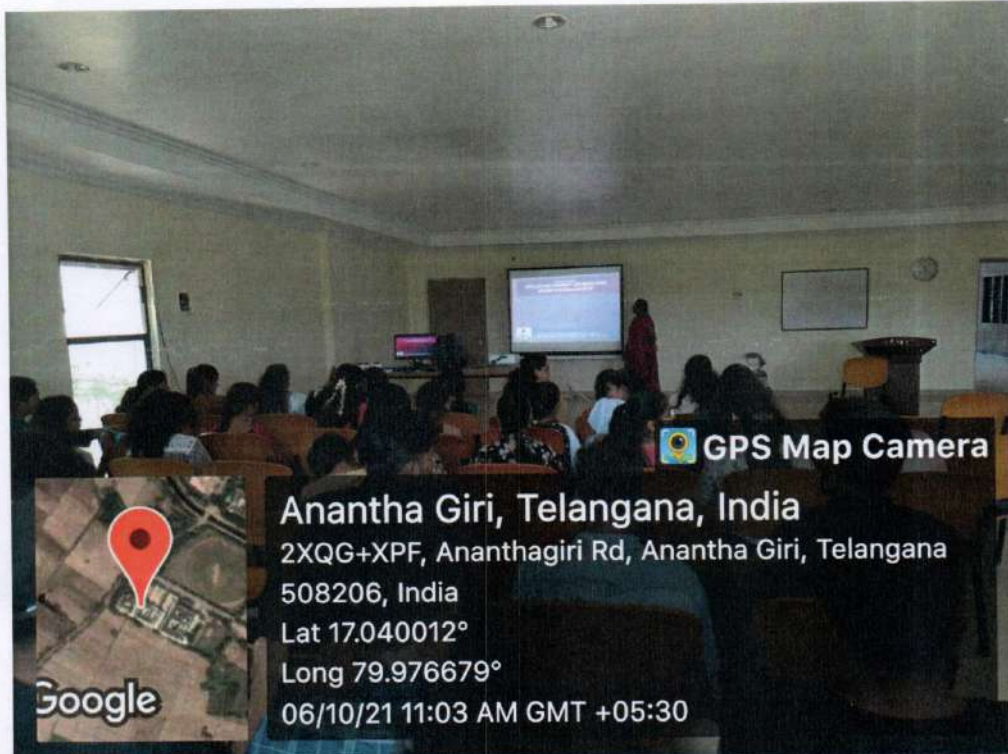

Risk management is essential for identifying and mitigating potential risks associated with new drugs, and for communicating these risks to healthcare providers and patients.

The pharmaceutical industry operates in a global market, and navigating regulatory requirements in different countries and regions can be challenging. It is important to understand and comply with international regulations to ensure global access to new drugs.

DEVELOPMENT OF ENTREPRENEURSHIP IN RETAIL AND WHOLESALE PHARMACY

29th Sept 2021

About the college:

Anurag Pharmacy College was established in 2007 by "Amartya Educational Society" with an objective of bringing quality education closer to the rural students. Right from the beginning the management was clear about establishing the center of excellence in pharmacy. Accordingly a good institution with strong foundation has taken a shape in the form of Anurag Pharmacy College imparting education for B. Pharm, M. Pharm course in two branches along with Pharm D.

This college is having well equipped and high standard laboratories and state of art library is well stocked with 3241 books, 37 printed and e-journals, computer lab with high speed internet facility. Apart from academics our college encourages students in extracurricular activities and also our faculty provides GPAT special classes.

About the Department:

Pharmacy is the science and practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications, aiming to ensure the safe, effective, and affordable use of medicines. It is a miscellaneous science as it links health sciences with pharmaceutical sciences and natural sciences. The professional practice is becoming more clinically oriented as drugs are manufactured by pharma industries.

About the Programme:

The course will give knowledge about development of entrepreneurship in retail and wholesale pharmacy.

- Enhanced a proactive and innovative mindset to identify and seize opportunities in the retail and wholesale pharmacy industry.
- Acquired a solid understanding of the pharmacy sector, including its dynamics, challenges, and potential areas for growth.
- Learned how to create a comprehensive business plan tailored specifically to the pharmacy business, incorporating financial projections and marketing strategies.
- Gained insights into the legal and regulatory aspects of running a pharmacy, ensuring compliance and ethical practices.
- Acquired the skills to effectively manage finances, including budgeting, inventory control, and profitability analysis.
- Learned strategies to provide exceptional customer service, foster customer loyalty, and build strong relationships with clients.

Resource Person:

Mrs. N. Amani
Assistant Professor
Department of Pharmacology,
Madhira Institute of Technology &
Sciences, Kodad, Telangana.

Last date to Registration: 28/09/2021

Objectives of the program:

- Understand the fundamental concepts of entrepreneurship and how they apply specifically to the retail and wholesale pharmacy sector.
- Gain a comprehensive understanding of the retail and wholesale pharmacy industry, including current trends, challenges, and opportunities.
- Learn effective strategies for establishing and growing a successful pharmacy business, from initial planning to marketing and expansion.
- Acquire knowledge about the legal and regulatory frameworks governing the pharmacy sector, ensuring compliance and ethical practices.
- Discover techniques for providing excellent customer service, building lasting relationships with clients, and creating a loyal customer base.

Topics to be covered:

- Introduction to Entrepreneurship in Retail and Wholesale Pharmacy
- Trends, Challenges, and Opportunities
- Business Planning and Development Strategies
- Legal and Regulatory Compliance for Pharmacies
- Marketing and Promotions
- Customer Service Excellence and Relationship Building
