

## **Policy for Energy Utilization and Environment**

Anurag Pharmacy College demise a clean and ecologically pleasant campus, where eco-friendly teaching and activities work together to maintain a environmentally friendly behavior. This green campus concept allows the institution to take the lead in the regeneration of environmental culture by promoting environmental ideas among the students and faculty. In order to instill the eco-consciousness in themselves and the world around them, the institute also encourages the students and staff to adopt, implement and support environmentally friendly practices. The growing human footprint on the planet is generating significant environmental issues that are going to become worse over time. A massive effort is required to offset the detrimental impacts of human activities on the environment, which in turn effect how we interact with the world and with one another. All problem solving strategies must be used in order to create true change.

### **Objectives:**

- To encourage the students to maintain clean and green environment.
- To educate the students to create awareness among the public.
- To instill the students, the value of the environment and the issues that it faces.

This environment and energy policy is binding for all the components of the institution and applies to all its staff and students to the various activities undertaken by the institution. It will help us to implement efficiency and environmental awareness to conservation of natural resources and to limit its usage.

- To assess our energy usage and measure its impact on the environment.
- To install solar panels for the generation of alternate energy.
- Turn off your monitor when you leave your table.
- Turn off unnecessary lights and use daylight instead.
- Use LED or compact fluorescent bulbs as much as possible.
- Switch off lights, fans in conference rooms, classrooms and lecture halls when they are not in use. Avoid the use of decorative lighting.
- Use the fans only when they are needed.

## **Energy Consumption:**

LED bulbs are used in maximum to save energy. Electric and electronic equipment is turned off when not in use. Some equipment cannot be turned off entirely but can be turned down to save energy. Reduce water heater temperature (consistent with health requirements) in buildings that do not have laboratory or cooking facilities. Computers and other electronic equipment have become ubiquitous in campus buildings and dorms in recent years, contributing dramatically to increases in energy consumption making sure that these energy-saving modes are enabled can produce significant energy savings. Lights should be turned off when not in use, but many people forget to take this step. To ensure that switches are off when desired, two effective options are to install occupancy sensors or to recruit staff to serve as “energy monitors” in each campus building. Energy conservation-themed posters and stickers scattered around campus can be effective reminders, especially when designed as part of a larger energy-awareness campaign.

## **Renewable Energy:**

Solar energy is the most cleanest and the abundant renewable energy source. The institute provides the solar energy; the stakeholders are encouraged for promoting and adopting renewable energy.

## **Public transport/ Bus facility:**

The College operates a fleet of busses, to transport students and staff to nearby towns to college and back. A full-fledged Transport department functions in the college with buses to provide transport facility to students and staff from various places. This service is offered ensuring a hassle-free and safe transportation. There are 27 college buses help the students & staff to commute to the college from various places especially all remote areas. The number of buses will be increased corresponding to the increase in the intake of students.

## **Pedestrian-friendly Paths**

The campus possesses well laid roads which are friendly to the inmates of the campus. The pathways inside the campus are well maintained and pedestrians can walk safely through the campus as entry of vehicles is restricted. Security Guards at the gates keep a watch on the entry of vehicles and crossing into the campus. Pedestrian friendly pathways are properly marked with suitable sign boards. Many of the non-teaching staff and a few students in and around the location daily walk down to college.
